Product Description

ISO9001 2015 Certified Stainless Steel Semi-Tubular Rivets for Aerospace Applications

FINEX | Fine and Express FASTENERS

Ensure precision and reliability in aerospace applications with **Stainless Steel Semi-Tubular Rivets**, engineered to meet the highest standards of performance and durability. Crafted from premium **stainless steel**, these rivets offer exceptional strength, corrosion resistance, and fatigue resistance, making them ideal for the demanding environments of the aerospace industry.

The **semi-tubular design** reduces the amount of force required for installation while providing a secure and consistent fastening solution. These rivets are lightweight yet robust, ensuring they meet the stringent weight and performance requirements of aerospace applications. Whether used in aircraft assembly, structural components, or critical systems, these rivets deliver unmatched reliability and longevity.

Key Features:

Material: High-quality stainless steel for superior strength and corrosion resistance.

Design: Semi-tubular construction for easy installation and secure fastening.

Applications: Specifically designed for aerospace applications, including aircraft assembly and structural components.

Performance: Lightweight, durable, and resistant to fatigue and extreme conditions.

Compliance: Meets aerospace industry standards for safety and reliability.

Choose **Stainless Steel Semi-Tubular Rivets** for your aerospace fastening needs. Their combination of precision engineering, robust materials, and reliable performance ensures they can withstand the rigors of aerospace environments while maintaining the integrity of your assemblies. Trust in their quality to deliver secure and long-lasting connections in even the most critical applications.

Why Choose Us

NO1.Drive compariason

NO2.Torque comparison

NO3.Screw Plating Comparison

Our screws: good finish, clear thread, even coating, bright appearance.

VS

Bad screws on the market: bad finish, uneven coating, thread is oxidized, the finish is blacked.

NO4.Screw Material Comparison

Our screws: we use quality carbon steel material, Chemical Element content in Steel meets the requirement of ISO standard, they won't be broken after 90° bent, high strength, good toughness requirement of ISO

VS

Bad screws on the market: bad carbon steel material, Chemical Element content in Steel doesn't meet the requirement of ISO standard, they will be easily broken after 90° bent, high strength and bad toughness.

NO5.Mechanical Properties comparison

Our self tapping screws: our screws have high strength, enough hardness, good toughness after heat treated, they won't be broken after bent.

VS

Bad screws on the market: they have high strength and bad toughness, thread will easily be broken, because the screws are not tempered.

NO6. Corrosion Resistance Comparison of SUS304

Our SUS304 screws: nickel chemical element content won't be less than 8, meets ISO requirement. The finish won't be oxidized, rusted and has good anti-corrosion capacity standard, they won't be broken after 90° bent, high strength, good toughness.

VS

SUS304 screws on the market: nickel chemical element content will be less than 8, even doesn't have nickel plated, which doesn't meet ISO requirement. The finish will be oxidized, rusted and lose anti-corrosion capacity.
