

Right Thread Torx Drive Countersunk Machine Screw For Customizable Needs

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: FinExpress
- Model Number: machine screw
- Minimum Order Quantity: 100000
- Price: \$0.07/pieces 10000-49999 pieces
- Packaging Details: 1.1000pcs / plastic bag,20kgs/ carton ,then put on the wood pallet ,
2.Carton size:28cm*18cm*13cm,
3.Wood pallet size:118cm*113cm,Weight:700~800Kg
Bulk:0.8 cubic
4.The weight of 20 FT Container:20~25 Tons
5,As your requirements
- Delivery Time: 7~15 Working Day
- Payment Terms: T/T,L/C
- Supply Ability: 500000000 Piece/Pieces per Week

Product Specification

- Finish: Plain, ZINC PLATED, Nickel Plated
- Material: Stainless Steel, Steel
- Measurement System: INCH, Metric
- Head Style: Pan, Truss, Flat
- Standard: DIN
- Commodity: Torx Drive Countersunk Machine Screw
- Thread Type: Machined Thread
- Thread Direction: Right
- Available Size: M1~M20/Custom
- ROHS Compliant: Yes
- Application: Fastener,connection,decoration
- Certificate: ISO9001:2015
- Highlight: **Right Thread Countersunk Machine Screw,
Torx Drive Countersunk Machine Screw,
Customizable Small Machine Screw**

Product Description

Right Thread Torx Drive Countersunk Machine Screw For Customizable Needs

FINEX | Fine and Express
FASTENERS

Our Right Thread Torx Drive Countersunk Machine Screws are designed with a standard right - hand thread. This common thread direction ensures easy and intuitive installation for most applications. Whether you're using a power tool or working manually, the right - thread design allows for smooth and efficient tightening, reducing the risk of cross - threading. It's a tried - and - true configuration that has been trusted in countless projects across various industries.

Torx Drive System

The Torx drive system is a key highlight of these machine screws. The unique six - pointed star - shaped socket provides a more secure and positive engagement with the screwdriver or bit. This reduces the likelihood of slipping, even when applying high torque, which is especially important when dealing with tight - fitting or heavy - duty applications. The Torx drive also enables faster installation and removal compared to some traditional drive types, increasing productivity during assembly processes.

Countersunk Head

The countersunk head design is both functional and aesthetically pleasing. When installed, the head of the screw sits flush with the surface of the material, creating a smooth and seamless finish. This not only enhances the appearance of the assembled product but also makes it safer, as there are no protruding parts that could cause injury or catch on other objects. The countersunk head is ideal for applications where a flat surface is required, such as in furniture, electronics, and automotive interior components.

Versatile for Customizable Needs

These machine screws are incredibly versatile and can be customized to meet a wide range of requirements. Whether you need a specific length to fit a unique component, a particular material to suit the environmental conditions of your project, or a customized finish for aesthetic or functional purposes, we can accommodate your needs. For example, in the electronics industry, where miniaturization is crucial, we can provide shorter screws with precise threading for delicate circuit board assembly. In the outdoor furniture industry, we can offer screws made from corrosion - resistant materials like stainless steel and finished with a protective coating to withstand harsh weather conditions.

High - Quality Manufacturing

We take pride in the quality of our Right Thread Torx Drive Countersunk Machine Screws. Each screw is manufactured using high - grade materials and state - of - the - art production techniques. The raw materials are carefully selected to ensure optimal strength, durability, and corrosion resistance. During the manufacturing process, strict quality control measures are in place to guarantee precise threading, accurate head dimensions, and consistent drive socket quality. Every screw is inspected before leaving our facility to ensure it meets our high - quality standards, providing you with a reliable product that you can trust for your projects.

Diverse Application Scenarios

These machine screws find extensive use in various industries. In the automotive sector, they are used to fasten interior trim pieces, securing them firmly in place while maintaining a sleek appearance. In the electronics industry, they are essential for assembling computer cases, laptops, and other electronic devices, providing a secure connection for components. In the furniture industry, they are used to attach drawers, shelves, and decorative elements, ensuring a stable and long - lasting assembly. Additionally, they are popular in DIY projects, where their customizable nature allows hobbyists to create unique and functional items.

Exceptional Customer Support

Our dedicated customer service team is here to assist you throughout your experience with our products. If you have any questions about customization options, product specifications, or installation advice, we're just a message or call away. We pride ourselves on providing prompt and detailed responses to all inquiries, ensuring that you have all the information you need to make informed decisions. From the initial consultation to after - sales support, we strive to make your interaction with us as smooth and satisfactory as possible.

Choose our Right Thread Torx Drive Countersunk Machine Screw for your next project and experience the perfect combination of precision, versatility, and quality.

Specification

	More Detail Informations
Available Material	1.Stainless Steel: SS303, SS304, SS316, SS410, SS420; 2.Carbon steel: C1006,C1010,C1018,C1022,C1035K,C1045; 3.Brass: C3602,C3604,Hpb59,Hpb62,Hpb65,Hpb58,Hpb70 ; 4.Aluminum: Al6061, Al6063 etc or as your requirements
Head type	CSK Head,Pan Head,Truss Head,Hexagon Head,Round Head,Oval Head,Button Head,Cap Head,Cheese Head,etc.
Hardness	Carbon Steel:HRC:28~35 ,HV450~700 Alloy Steel:HRC:32~39(grade10.9) HRC:39~44(grade12.9)
Finish	Zinc plated, Nickel plated, Bronze, Copper,Phosphate, Oxidation black, Passivation, Tin, Dacromet, Gold, Chrome, Silver, Phosphorization,Zinc-nickel alloy plated etc.
Sample Available	The sample is free of charge if we have the existing tooling,you only need to pay for the freight cost
Delivery time	Samples time 3-5 working days, Lead time 20-25 working days
Pricing Term	EXW Dongguan(FCA),FOB, CIF, CNF, DDU,etc.
Packing	Bulk in PE bag or Small boxes.then in carton .pallet
Payment term	TT (30% in advance as deposit, balance before delivery) , L/C, Western Union,PayPal etc
Management system	ISO9001:2015
Certificate	ISO,ROHS

Why Choose Us

NO1.Drive compariason

Our screws: cross recess drive remains intact after repeatedly used.

VS

Bad screws on the market: cross recess drive cannot be used after repeatedly used, they may slip or tear out the Philips screw head.

NO2.Torque comparison

Our screws: Nylon patch is high quality, prevailing-torque is more

VS

Bad screws on the market: prevailing-torque is 0 after it is screwed in and out for five times, nylon patch will peel off.

NO3.Screw Plating Comparison

Our screws: good finish, clear thread, even coating, bright appearance.

VS

Bad screws on the market: bad finish, uneven coating, thread is oxidized, the finish is blacked.

NO4.Screw Material Comparison

Our screws: we use quality carbon steel material, Chemical Element content in Steel meets the requirement of ISO standard, they won't be broken after 90° bent, high strength, good toughness.requirement of ISO

VS

Bad screws on the market: bad carbon steel material, Chemical Element content in Steel doesn't meet the requirement of ISO standard, they will be easily broken after 90° bent, high strength and bad toughness.

NO5.Mechanical Properties comparison

VS

Our self tapping screws: our screws have high strength, enough hardness, good toughness after heat treated, they won't be broken after bent.

Bad screws on the market: they have high strength and bad toughness, thread will easily be broken, because the screws are not tempered.

NO6. Corrosion Resistance Comparison of SUS304

VS

Our SUS304 screws: nickel chemical element content won't be less than 8, meets ISO requirement. The finish won't be oxidized, rusted and has good anti-corrosion capacity. standard, they won't be broken after 90° bent, high strength, good toughness.

SUS304 screws on the market: nickel chemical element content will be less than 8, even doesn't have nickel plated, which doesn't meet ISO requirement. The finish will be oxidized, rusted and lose anti-corrosion capacity.

FAQ

Q1: What is your main products and material supply?

A1: Our main products are Electronic screws, Sems screws, Tapping screws, Chicago screws, Shoulder screws etc. Special Non-standard studs, Turning parts and High-end precision complex CNC Machining parts etc.

A2: Carbon Steel, Alloy Steel, Aluminum alloy,Stainless Steel, Brass, Copper ,Titanium alloy or according to your requirement.

Q2: When can I get the price?

A: We usually offer you a quotation within 12 hours, and the special offer is not more than 24 hours.Any urgent cases, please contact us directly by phone or send email to us.

Q3: What about the transportation and delivery date?

A: If the weight of goods more than 80kg,Normally we use shipment to transprot the orders. It is about 20-30days . If the weight of goods less than 80kg,or there are urgent, we can send the goods via air express,It is 3~5 days.

Q4: What's your packing?What to do in case of damaged goods during transport?

A1: Our Normal packing is bulking in Cartons, less than 20 kgs/carton, 48 cartons / pallet. We also can pack products according to your requirement.

A2: To avoid any subsequent trouble regarding quality issue, we suggest you check the goods once you receive them. If there is any transport damaged or quality issue, don't forget take the detail pictures and contact us as soon as possible, we will properly handle it to make sure your loss to reduce to the smallest.

Q5: Can I get discounts?

A: Yes, for big order, frequent customers, we give reasonable discounts.

Q6: Do you have enough capacity?

A: Our production equipment is a new imported equipment. We have a group of skilled workers who have been working for more than 10 years. Their production experience is very rich and their skills are very skilled. The screws can be 30 million pcs/month. We have sufficient funds to ensure the normal operation of the factory.
