

## Customized M4 Metric Spring Washer Stainless Steel 304 Metal Washer DIN127

### Our Product Introduction

for more products please visit us on [metalscrewfastener.com](http://metalscrewfastener.com)

#### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: FineExpress
- Model Number: FineExpress washer
- Minimum Order Quantity: 50000
- Price: \$0.19/pieces 1000-9999 pieces

#### Product Specification

- Finish: Black, ZINC, Plain
- Style: Steel Washer
- Material: Brass, Stainless Steel, Steel, Aluminium, 18-8 STAINLESS STEEL, Bronze
- Application: Heavy Industry, Retail Industry, Automotive Industry, Electrical,electronics,cabint
- Standard: DIN
- Reliability Test: Mechanical Dimentions,salt Spray Endurance Test
- Service: Customized OEM
- Sample: Available
- Function: Connection,Fastening And Decoration
- MOQ: 1 Piece In Stock, 50,000 Pcs Customized
- Delivery Time: In Stock 5~7 Working Days, Customized 15~25 Working Days
- Highlight: **M4 Metric Spring Washer,**  
Stainless Steel Metal Washer

## Tailored to Your Specifications

Our Customized M4 Metric Spring Washers are designed with your unique needs in mind. Whether you require a specific spring tension for a high - stress application, a particular thickness to fit precise tolerances, or a custom finish for aesthetic or functional purposes, our team of skilled engineers and craftsmen is ready to bring your vision to life. We work closely with you throughout the customization process, ensuring that every washer meets your exact requirements. This level of personalization allows you to optimize the performance of your assemblies, making them ideal for a wide range of industries, from automotive and aerospace to electronics and machinery manufacturing.

## Superior Stainless Steel 304 Material

Constructed from top - grade Stainless Steel 304, our metal washers offer

outstanding corrosion resistance, strength, and durability. Stainless Steel 304 is known for its excellent resistance to rust, staining, and oxidation, making it suitable for both indoor and outdoor use. It can withstand harsh environmental conditions, including exposure to moisture, chemicals, and extreme temperatures. This makes our washers perfect for applications where reliability and long - term performance are crucial. Whether it's in a marine environment, a chemical processing plant, or a high - humidity industrial setting, you can trust our Stainless Steel 304 washers to maintain their integrity and functionality over time.

## **Compliance with DIN127 Standard**

Our M4 Metric Spring Washers strictly adhere to the DIN127 standard. This ensures that the dimensions, shape, and performance of our washers meet the highest quality and safety requirements. The DIN127 standard specifies the precise design and manufacturing parameters for spring washers, guaranteeing consistent performance

and compatibility with other components. When you choose our washers, you can be confident that they will fit seamlessly with your M4 bolts and nuts, providing a secure and reliable connection. The compliance with this standard also means that our washers are recognized and trusted in industries worldwide.

## **Optimal Spring Performance**

The spring design of our washers is engineered to provide optimal performance. The carefully calculated spring tension ensures that the washers can effectively absorb vibrations, shocks, and dynamic loads. This helps to prevent loosening of bolts and nuts over time, even in applications where there is significant movement or mechanical stress. The spring action also compensates for any thermal expansion or contraction that may occur, maintaining a constant clamping force. Whether you're using our washers in a high - speed rotating machinery, a vibrating engine, or a structure subject to temperature

fluctuations,  
they will keep  
your  
connections  
tight and  
secure.

## **Versatile Applications**

These customized M4 Metric Spring Washers are incredibly versatile. In the automotive industry, they are used in engine assemblies, suspension systems, and braking components to ensure reliable fastening. In the aerospace sector, they play a crucial role in aircraft structures, where safety and performance are of utmost importance. In the electronics industry, they are used to secure circuit boards and components, protecting them from vibrations and mechanical stress. They are also widely used in general machinery, construction, and DIY projects. No matter the application, our washers offer a reliable and customizable solution.

## **Rigorous Quality Control**

Quality is at the core of our manufacturing process. Every Customized M4 Metric Spring Washer undergoes a series of rigorous quality control checks. We start by inspecting the Stainless Steel 304 raw

material to ensure its purity and quality. During the manufacturing process, we monitor the production of each washer to ensure that it meets the DIN127 standard and your specific customization requirements. After production, each washer is thoroughly tested for spring tension, dimensional accuracy, and corrosion resistance. This commitment to quality means that you can rely on our washers to perform flawlessly in your projects.

## **Exceptional Customer Service**

Our customer service team is dedicated to providing you with the best possible experience. From the moment you first inquire about our customized washers to the delivery of your order, we are here to assist you every step of the way. If you have any questions about customization options, installation instructions, or product compatibility, our team is just a phone call or email away. We pride ourselves on providing prompt and helpful responses, ensuring that you have all the information you need to make informed decisions. We
