Product Overview

Our Ultrasonic Brass Threaded Inserts are precision-engineered for seamless integration into plastic and composite furniture components. Designed for ultrasonic installation, these inserts provide durable, reusable threads in materials like ABS, Nylon, POM, and fiberglass. The brass construction ensures corrosion resistance, while the knurled design guarantees a secure grip, making them ideal for furniture assembly, outdoor fixtures, and high-stress industrial applications.

Key Features

Ultrasonic Installation Compatibility

Fast & Reliable: Ultrasonic energy melts plastic around the insert, creating a permanent bond in seconds without heat damage.

No Adhesives Needed: Eco-friendly, solvent-free installation process.

Brass Construction

Corrosion Resistance: Ideal for humid or outdoor environments (e.g., patio furniture, marine applications).

High Tensile Strength: Withstands repeated assembly/disassembly without thread wear.

Knurled Design for Maximum Retention

Diamond or Straight Knurling: Bites into plastic for anti-rotation and pull-out resistance.

Material Compatibility: Works with thermoplastics, composites, and soft metals.
