Product Description

Flat Head Self Tapping Concrete Screws Blue Coating Phillips Self Drilling Screws

Innovative Self-Tapping and Self-Drilling Design

Our Self Tapping Concrete Screws with Phillips drive are engineered for efficient installation. The self-tapping feature eliminates the need for pre-drilling in most cases, while the self-drilling capability ensures quick and smooth penetration into concrete surfaces. This design saves time and effort for both DIY enthusiasts and professional contractors.

Durable Blue Coating

The vibrant blue finish provides corrosion resistance against moisture and chemicals, making these screws suitable for both indoor and outdoor applications. The distinctive color also serves as a visual identifier for easy tool selection.

Phillips Drive for Easy Installation

The cross-shaped Phillips drive ensures excellent torque transfer and grip, allowing for precise control during installation with either manual screwdrivers or power drills. This reduces cam-out risk and ensures a secure fit in concrete applications.

High-Quality Construction

Made from premium-grade hardened steel, these screws offer exceptional strength and durability for heavy-load applications. The engineered tip and threading provide efficient penetration and a tight grip in concrete for long-term stability.

Versatile Applications

Suitable for various residential and commercial projects including:

- Installing curtain rods, light fixtures, and electrical boxes
- Mounting signage, equipment racks, and security cameras
- Fastening to concrete, brick, and block substrates
