Product Description

Custom 4.5MM Brass Binding Screw Posts Belt Chicago Screw Rivets Silver Plated Finish

FINEX | Fine and Express FASTENERS

Elevate your leathercraft, belt-making, and DIY projects with **Custom 4.5MM Brass Binding Screw Posts**, also known as **Chicago Screws** or **belt rivets**. These high-quality fasteners are crafted from durable **brass** and feature a sleek **silver-plated** finish, offering both strength and a polished, professional appearance. Perfect for securing belts, straps, holsters, and other leather goods, these screws provide a reliable and reusable fastening solution.

Key Features:

Material: Premium brass for durability and a classic aesthetic.

Finish: Silver-plated for a polished, corrosion-resistant look.

Size: 4.5MM diameter, customizable to your specific length requirements.

Design: Male-female threaded design for secure, vibration-resistant fastening.

Applications: Ideal for belts, leathercraft, holsters, bags, and DIY projects.

Applications:

Belts and Straps: Perfect for securing belt buckles or adjustable straps.

Leathercraft: Use in holsters, bags, wallets, and other leather goods.

DIY Projects: Great for custom builds, prototypes, or creative designs.

Tactical Gear: Suitable for securing pouches, sheaths, and other gear.

Why Choose Custom 4.5MM Brass Binding Screw Posts?

These screws combine functionality with a timeless design, making them a favorite among leatherworkers, crafters, and DIY enthusiasts. The brass construction ensures long-lasting performance, while the silver-plated finish adds a touch of elegance. Whether you're creating a custom belt, repairing a bag, or designing tactical gear, these screws provide a secure and reusable fastening solution.

Why Choose Us

NO1.Drive compariason

NO2.Torque comparison

NO3.Screw Plating Comparison

Our screws: good finish, clear thread, even coating, bright appearance.

VS

Bad screws on the market: bad finish, uneven coating, thread is oxidized, the finish is blacked.

NO4.Screw Material Comparison

Our screws: we use quality carbon steel material, Chemical Element content in Steel meets the requirement of ISO standard, they won't be broken after 90° bent, high strength, good toughness requirement of ISO

VS

Bad screws on the market: bad carbon steel material, Chemical Element content in Steel doesn't meet the requirement of ISO standard, they will be easily broken after 90° bent, high strength and bad toughness.

NO5.Mechanical Properties comparison

Our self tapping screws: our screws have high strength, enough hardness, good toughness after heat treated, they won't be broken after bent.

VS

Bad screws on the market: they have high strength and bad toughness, thread will easily be broken, because the screws are not tempered.

NO6. Corrosion Resistance Comparison of SUS304

Our SUS304 screws: nickel chemical element content won't be less than 8, meets ISO requirement. The finish won't be oxidized, rusted and has good anti-corrosion capacity standard, they won't be broken after 90° bent, high strength, good toughness.

VS

SUS304 screws on the market: nickel chemical element content will be less than 8, even doesn't have nickel plated, which doesn't meet ISO requirement. The finish will be oxidized, rusted and lose anti-corrosion capacity.
