Product Description

Custom 1/4 3/8 1/2 Black Oxide Male Female Chicago Screws for IWB Kydex Leather Holster

Available in 1/4, 3/8, and 1/2 sizes, these custom Chicago screws ensure a perfect fit for your IWB Kydex leather holster. The variety of sizes caters to different design requirements, allowing you to choose the most suitable one for your specific project. Whether you're making a compact or a larger - sized holster, these screws offer the flexibility to meet your needs.

Durable Black Oxide Finish

Featuring a black oxide finish, these screws not only look sleek but also provide enhanced durability. The black oxide coating offers corrosion resistance, protecting the screws from wear and tear, especially in the demanding environment of a holster. This ensures that your holster remains securely fastened over time, maintaining its functionality and reliability.

Male - Female Design for Secure Attachment

The male - female design of these Chicago screws is engineered for a secure and easy - to - assemble connection. This design allows for quick installation and disassembly, which is crucial when making adjustments to your IWB holster. Whether you need to replace parts or modify the holster's structure, the male - female connection makes the process simple and efficient.

Ideal for IWB Kydex Leather Holsters

Specifically designed for IWB Kydex leather holsters, these screws are the perfect choice for both DIY enthusiasts and professional holster makers. They blend well with the Kydex and leather materials, providing a seamless and sturdy attachment. Whether you're aiming for a minimalist or a more elaborate holster design, these screws offer the strength and style to hold your holster together.

Choose our custom black oxide Chicago screws for your IWB Kydex leather holster projects and experience a combination of precision, durability, and functionality.

Why Choose Us

Finish

NO1.Drive compariason

Our screws: cross recess drive remains intact after repeatedly used.

Bad screws on the market: cross recess drive cannot be used after repeatedly used, they may slip or tear out the Philips screw head.

NO2. Torque comparison

Our screws: Nylon patch is high quality, prevailing-torque is more

VS

prevailing-torque is 0 after it is screwed in and out for five times, nylon patch will peel off.

NO3.Screw Plating Comparison

Our screws: good finish, clear thread, even coating, bright appearance.

Bad screws on the market: bad finish, uneven coating, thread is oxided, the finish is blacked.

NO4.Screw Material Comparison

Our screws: we use quality carbon steel material, Chemical Element content in Steel meets the requirement of ISO standard, they won't be broken after 90° bent, high strength, good

Bad screws on the market: bad carbon steel material, Chemical Element content in Steel doesn't meet the requirement of ISO standard, they will be easily broken after 90° bent,

NO5. Mechanical Properties comparison

VS

Our self tapping screws: our screws have high strength, enough hardness good toughness after heat treated, they won't be broken after bent

high strength and bad toughness.

Bad screws on the market: they have high strength and bad toughness, thread will easily be broken, because the screws are not tempered.

NO6. Corrosion Resistance Comparison of SUS304

VS

Our SUS304 screws: nickel chemical element content won't be less than 8, meets ISO requirement. The finish won't be oxided, rusted and has good anti-corresion capacity.standard, they won't be broken after 90° bent, high strength, good toughness.

SUS304 screws on the market:
nickel chemical element content will
be less than 8, even doesn't have
nickel plated, which doesn't meet ISO
requirement. The finish will be oxided,
rusted and lose anti-corresion
capacity.

Company Profile
