Product Description

Stainless steel Solid Step Metal Rivet Customizable For Specific Requirements

FINEX | Fine and Express FASTENERS

Meet your unique fastening needs with **Customizable Stainless Steel Solid Step Metal Rivets**, designed to deliver exceptional strength, durability, and precision. Crafted from high-quality **stainless steel**, these rivets offer superior corrosion resistance, making them ideal for use in demanding environments such as automotive, aerospace, industrial machinery, and construction.

The **solid step design** provides a robust and reliable fastening solution, ensuring a secure hold even under high stress or vibration. These rivets are fully **customizable** to meet your specific requirements, including size, shape, and finish, allowing for a perfect fit in any application. Whether you need a standard design or a tailored solution, these rivets provide the flexibility and performance you need.

Key Features:

Material: Premium stainless steel for exceptional strength and corrosion resistance.

Design: Solid step construction for reliable and durable fastening.

Customizable: Tailored to your specific size, shape, and finish requirements.

Applications: Ideal for automotive, aerospace, industrial, and construction projects.

Performance: Resistant to wear, corrosion, and extreme conditions.

Why Choose Solid Step Metal Rivets?

These rivets combine durability, precision, and adaptability, making them the perfect choice for securing critical components in even the most challenging environments. Their customizable design ensures they meet your exact specifications, while the stainless steel construction guarantees long-lasting performance.

Upgrade your fastening systems with Customizable Stainless Steel Solid Step Metal Rivets – the ultimate choice for precision, durability, and performance in demanding applications.

Why Choose Us

NO1.Drive compariason

NO2.Torque comparison

NO3.Screw Plating Comparison

Our screws: good finish, clear thread, even coating, bright appearance.

VS

Bad screws on the market: bad finish, uneven coating, thread is oxidized, the finish is blacked.

NO4.Screw Material Comparison

Our screws: we use quality carbon steel material, Chemical Element content in Steel meets the requirement of ISO standard, they won't be broken after 90° bent, high strength, good toughness requirement of ISO

VS

Bad screws on the market: bad carbon steel material, Chemical Element content in Steel doesn't meet the requirement of ISO standard, they will be easily broken after 90° bent, high strength and bad toughness.

NO5.Mechanical Properties comparison

Our self tapping screws: our screws have high strength, enough hardness, good toughness after heat treated, they won't be broken after bent.

VS

Bad screws on the market: they have high strength and bad toughness, thread will easily be broken, because the screws are not tempered.

NO6. Corrosion Resistance Comparison of SUS304

Our SUS304 screws: nickel chemical element content won't be less than 8, meets ISO requirement. The finish won't be oxidized, rusted and has good anti-corrosion capacity standard, they won't be broken after 90° bent, high strength, good toughness.

VS

SUS304 screws on the market: nickel chemical element content will be less than 8, even doesn't have nickel plated, which doesn't meet ISO requirement. The finish will be oxidized, rusted and lose anti-corrosion capacity.
