## Product Description

Aluminium Closed Eye Screws Black Oxide Finish Closed Screw Hook

### FINEX | Fine and Express FASTENERS

The closed screw hook design adds another layer of convenience and functionality. Its shape allows for easy and rapid attachment to a variety of surfaces, from wooden beams to metal structures. This ease of installation makes it a favorite among both professional contractors and DIY enthusiasts. The screw hook's threading is precision - cut, ensuring a smooth and tight fit into the material, which not only simplifies the installation process but also enhances the overall holding power of the screw.

### All - Weather Black Oxide Finish (Optional)

For enhanced protection and a sleek appearance, our Closed Eye Screws can be finished with a black oxide coating. This finish is not merely cosmetic; it provides excellent corrosion resistance, safeguarding the screws from the elements. Whether used in the damp conditions of a coastal area, the high - humidity environment of a greenhouse, or the harsh chemicals in an industrial setting, the black oxide finish ensures that the screws maintain their integrity over time. Additionally, the black oxide coating gives the screws a professional and stylish look, making them suitable for applications where aesthetics matter, such as in high - end furniture or decorative installations.

### Diverse Range of Applications

These closed - eye screws find utility in a multitude of industries and projects. In the manufacturing sector, they are used to suspend machinery components, ensuring proper alignment and stability during operation. In construction, they play a crucial role in tasks like hanging formwork, installing scaffolding safety nets, or attaching curtain wall systems. In the home improvement realm, they are perfect for creating custom - made storage solutions, hanging plants, or installing swing sets. The furniture industry also benefits from these screws, using them to attach decorative elements, create adjustable shelves, or secure drawer pulls.

## Stringent Quality Control Measures

We take pride in our commitment to quality. Every Closed Eye Screw undergoes a rigorous manufacturing process, closely monitored at every stage. From the initial selection of raw materials to the final inspection, we ensure that each screw meets our stringent quality standards. Precision manufacturing techniques are employed to guarantee consistent dimensions, smooth threading, and a uniform finish. This attention to detail ensures that our screws perform flawlessly, providing you with a product you can trust for all your fastening needs.

## Why Choose Us

### NO1.Drive compariason

### NO2.Torque comparison

### NO3.Screw Plating Comparison

Our screws: good finish, clear thread, even coating, bright appearance.

VS

Bad screws on the market: bad finish, uneven coating, thread is oxidized, the finish is blacked.

### NO4.Screw Material Comparison

Our screws: we use quality carbon steel material, Chemical Element content in Steel meets the requirement of ISO standard, they won't be broken after 90° bent, high strength, good toughness requirement of ISO

VS

Bad screws on the market: bad carbon steel material, Chemical Element content in Steel doesn't meet the requirement of ISO standard, they will be easily broken after 90° bent, high strength and bad toughness.

### NO5.Mechanical Properties comparison

Our self tapping screws: our screws have high strength, enough hardness, good toughness after heat treated, they won't be broken after bent.

VS

Bad screws on the market: they have high strength and bad toughness, thread will easily be broken, because the screws are not tempered.

### NO6. Corrosion Resistance Comparison of SUS304

Our SUS304 screws: nickel chemical element content won't be less than 8, meets ISO requirement. The finish won't be oxidized, rusted and has good anti-corrosion capacity standard, they won't be broken after 90° bent, high strength, good toughness.

VS

SUS304 screws on the market: nickel chemical element content will be less than 8, even doesn't have nickel plated, which doesn't meet ISO requirement. The finish will be oxidized, rusted and lose anti-corrosion capacity.
