

## Stainless Steel Mechanical Expansion Anchor Bolt Grade 8.8 m8 m10 m12 m16 m24 m33 with Zinc Plated Finish

Our Product Introduction

for more products please visit us on [metalscrewfastener.com](http://metalscrewfastener.com)

### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: FINEX
- Model Number: Anchor Bolt
- Minimum Order Quantity: 1000 pieces
- Price: \$0.05/pieces 1000-49999 pieces
- Delivery Time: 7~15 working day

### Product Specification

- Material: Stainless Steel, Steel
- Finish: Zinc Plated
- Standard: DIN
- MOQ: 1 Piece In Stock, 30,000 Pcs Customized
- Package: Small Packing+Carton Packing+Pallet
- Delivery Time: In Stock 5~7 Working Days, Customized 15~25 Working Days
- Service: OEM ODM Custom Service
- Length: 1mm~500mm
- Certificate: ISO9001:2015, SGS, RoHs
- Highlight: Grade 8.8 Mechanical Expansion Anchor Bolt, m16 Mechanical Expansion Anchor Bolt, m12 Mechanical Expansion Anchor Bolt

## Unrivaled Quality and Strength

As a leading anchor bolt manufacturer, we take pride in presenting our high-grade 8.8 series anchor bolts, available in a comprehensive range of sizes from m8 to m33, including the commonly used m10, m12, m16, and m24. These bolts are meticulously crafted from top-notch materials, with a focus on mechanical properties and durability. The Grade 8.8 classification signifies their exceptional tensile and yield strength, making them suitable for a vast array of heavy-duty applications. Whether it's securing structural steel in large-scale construction projects, anchoring industrial machinery firmly to the floor, or providing reliable support in infrastructure developments, our anchor bolts won't let you down.

## Stainless Steel Advantage

Our stainless steel expansion anchor bolts

offer an added layer of protection and versatility. Made from corrosion-resistant stainless steel, they are designed to withstand the harshest environmental conditions. This makes them ideal for outdoor installations, coastal areas where salt air prevails, and any application where exposure to moisture or chemicals is a concern. The stainless steel construction not only prevents rust and corrosion but also ensures the longevity of the fastening system, reducing maintenance costs over time.

## **Precision Engineering for Perfect Fit**

Each anchor bolt is manufactured with precision-engineered threads and dimensions. The carefully designed threading provides excellent grip and torque transfer, allowing for seamless installation. The accurate dimensions guarantee a snug fit into pre-drilled holes, minimizing any play or movement once installed. This precision is crucial in applications where stability and reliability are non-negotiable,

such as in high-rise building construction, bridge repairs, and critical equipment installations.

## **Easy Installation**

### **Process**

We understand the importance of efficiency on the job site.

That's why our anchor bolts are designed with user-friendly installation in mind. The expansion mechanism is intuitive and straightforward, requiring minimal effort to activate.

Whether you're a professional contractor with years of experience or a DIY enthusiast tackling a home improvement project, you'll find our anchor bolts easy to work with.

Clear installation instructions are provided, ensuring that you can achieve a secure and proper installation every time.

## **Versatile Applications**

From residential construction, where they are used to mount curtain walls, balconies, and HVAC units, to commercial and industrial settings for anchoring heavy machinery, conveyor systems, and steel structures, our anchor bolts prove their worth in countless scenarios.

Their adaptability and reliability make them a go-to choice for architects, engineers, and builders across different sectors. Choose our anchor bolts, and you're choosing a product backed by years of manufacturing expertise, strict quality control, and a commitment to customer satisfaction. We are dedicated to providing you with the highest quality fastening solutions to meet your every need.
