

## 1/4 3/8 3/16 Stainless Steel Brass Fitting Tube Nuts for Industrial Length 1mm-500mm

### Our Product Introduction

for more products please visit us on [metalscrewfastener.com](http://metalscrewfastener.com)

#### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: FINEX
- Model Number: Brass Fitting Tube Nuts
- Minimum Order Quantity: 1000 pieces
- Price: \$0.05/pieces 1000-49999 pieces
- Delivery Time: 7~15 working day

#### Product Specification

- Material: Stainless Steel/ Carbon Steel/brass
- Standard: DIN
- MOQ: 1 Piece In Stock, 30,000 Pcs Customized
- Package: Small Packing+Carton Packing+Pallet
- Delivery Time: In Stock 5~7 Working Days, Customized 15~25 Working Days
- Service: OEM ODM Custom Service
- Length: 1mm~500mm
- Certificate: ISO9001:2015, SGS, RoHs
- Highlight: **Brass Fitting Tube Nuts,  
Stainless Steel Fitting Tube Nuts**

## Premium Material Selection

Our custom tube nuts are meticulously fabricated from high-quality stainless steel and brass. The stainless steel variants offer remarkable durability and corrosion resistance, making them ideal for applications where exposure to moisture, chemicals, or extreme temperatures is a concern. Meanwhile, the brass tube nuts bring a touch of elegance and excellent machinability. They are perfect for scenarios where a softer metal is preferred to avoid scratching or marring delicate components. Whether it's in a plumbing system, pneumatic setup, or hydraulic assembly, these materials ensure reliable performance.

## Precision Custom Sizing

Available in 3/8, 1/4, and 3/16 sizes, our tube nuts are custom-engineered to fit your specific requirements precisely. This level of customization

allows for seamless integration into your existing systems. The exacting dimensional accuracy guarantees a snug fit every time, minimizing the risk of leaks, pressure drops, or loose connections. Whether you're working on a small-scale DIY project or a large industrial installation, these precisely sized tube nuts will meet your needs.

## **Superior Thread Quality**

The threading on our tube nuts is of the highest standard. Each thread is carefully cut and polished to ensure smooth installation and disassembly. This not only saves you time and effort during assembly but also enhances the overall integrity of the connection. The threads are designed to withstand significant torque without stripping or deforming, providing a secure seal and reliable fastening.

## **Versatile Application Range**

These custom tube nuts have a broad spectrum of applications. In the plumbing industry, they are used to connect pipes and fittings, ensuring a watertight seal. In pneumatic and hydraulic

systems, they play a crucial role in maintaining pressure and preventing fluid leakage. From automotive cooling systems to home brewing setups, and from industrial machinery to artistic installations, our tube nuts prove their worth time and again.

## **Aesthetic Appeal and Finish**

Beyond functionality, the stainless steel and brass materials offer an aesthetic advantage. The sleek, polished finish of the stainless steel gives a modern and professional look, while the warm, golden hue of brass adds a touch of classic charm. This makes them suitable for both concealed and visible applications, enhancing the overall visual appeal of your projects.

## **Quality Assurance at Every Step**

We adhere to strict quality control measures throughout the manufacturing process. From the initial material sourcing to the final inspection of the finished tube nuts, every detail is scrutinized. Our products undergo rigorous testing for dimensional accuracy,
