Product Description

Aircraft-Grade 6061 Anodized Thumb Screw – Elevated Shoulder & Knurled Grip for Oscilloscope

Product Overview

Our Aircraft-Grade 6061 Anodized Thumb Screw combines aerospace-grade durability with ergonomic design for secure, tool-free adjustments in sensitive electronic and laboratory environments. Featuring a precision-engineered elevated shoulder, knurled grip, and non-conductive anodized finish, this screw is ideal for oscilloscopes, test equipment, and aerospace instrumentation requiring vibration resistance, electrical safety, and frequent calibration.

Key Features

- **6061-T6 Aluminum (Aircraft-Grade)**
 - High Strength-to-Weight Ratio: Robust yet lightweight, perfect for portable or vibration-prone equipment.
 - Hard Anodized Finish (Type III): Superior corrosion and wear resistance, withstanding harsh lab or industrial environments.
- **Elevated Shoulder Design**
 - Spacer Function: Maintains consistent clearance between components, preventing electrical contact or interference.
 - Thermal Isolation: Reduces heat transfer between mounted devices and chassis.
- **Knurled Grip & Non-Conductive**
 - Slip-Resistant Texture: Diamond-pattern knurling ensures secure grip, even with gloves or oily hands.
 - Non-Magnetic & Non-Conductive: Eliminates risk of electrical shorts or magnetic interference in sensitive electronics.

• Precision Threads

- Metric Threads (M3-M6): Compatible with standard instrumentation mounting holes (M3*0.5, M4*0.7, M5*0.8, M6*1.0).
- Vibration Resistance: Thread-locking design prevents loosening in high-frequency environments.
