Product Description

Black Nylon External Tooth Washer – Non-Conductive & Anti-Static for PCB Mounting

FINEX | Fine and Express FASTENERS

Product Overview

Our Black Nylon External Tooth Washer is engineered to provide secure, non-conductive fastening for sensitive electronics and PCB (Printed Circuit Board) assemblies. Featuring external teeth for superior grip and an anti-static formulation, this washer prevents loosening from vibrations while safeguarding against electrostatic discharge (ESD). Ideal for electronics, telecommunications, and industrial controls, it ensures reliable insulation and long-term stability in high-precision applications.

Key Features

Non-Conductive Nylon 6/6

Electrical Insulation: Prevents short circuits and current leakage in PCB, battery, or high-voltage assemblies.

Lightweight & Durable: Resists chemicals, oils, and wear, outperforming traditional metal washers.

Anti-Static Properties

ESD Protection: Dissipates static charges (surface resistivity 10^6 – 10^9 Ω /sq) to protect sensitive components.

No Magnetic Interference: Safe for use near sensors, RF equipment, and communication devices.

External Tooth Design

Enhanced Grip: Teeth bite into surfaces, preventing loosening under vibration or thermal cycling.

Even Load Distribution: Reduces stress on PCB traces and solder joints.

Corrosion & Chemical Resistance

Humidity-Proof: Withstands humid environments without rust or degradation.

RoHS & REACH Compliant: Free from hazardous substances, ensuring safe use in regulated industries.

Why Choose Us

NO1.Drive compariason

NO2.Torque comparison

NO3.Screw Plating Comparison

Our screws: good finish, clear thread, even coating, bright appearance.

VS

Bad screws on the market: bad finish, uneven coating, thread is oxidized, the finish is blacked.

NO4.Screw Material Comparison

Our screws: we use quality carbon steel material, Chemical Element content in Steel meets the requirement of ISO standard, they won't be broken after 90° bent, high strength, good toughness requirement of ISO

VS

Bad screws on the market: bad carbon steel material, Chemical Element content in Steel doesn't meet the requirement of ISO standard, they will be easily broken after 90° bent, high strength and bad toughness.

NO5.Mechanical Properties comparison

Our self tapping screws: our screws have high strength, enough hardness, good toughness after heat treated, they won't be broken after bent.

VS

Bad screws on the market: they have high strength and bad toughness, thread will easily be broken, because the screws are not tempered.

NO6. Corrosion Resistance Comparison of SUS304

Our SUS304 screws: nickel chemical element content won't be less than 8, meets ISO requirement. The finish won't be oxidized, rusted and has good anti-corrosion capacity standard, they won't be broken after 90° bent, high strength, good toughness.

VS

SUS304 screws on the market: nickel chemical element content will be less than 8, even doesn't have nickel plated, which doesn't meet ISO requirement. The finish will be oxidized, rusted and lose anti-corrosion capacity.
