Product Overview

Our Custom Hex Socket Jam Hollow Set Screws are designed for high-strength fastening in tight spaces and critical applications. Combining stainless steel and carbon steel materials with a hex socket (Allen key) drive and hollow jam head, these screws provide secure, vibration-resistant performance.

Available in customizable diameters (M1–M20), lengths (6mm–150mm), and material grades, they are ideal for securing gears, pulleys, and components in machinery, automotive systems, and industrial equipment. The hollow jam head ensures a flat, low-profile fit while maximizing load-bearing capacity.
